

Phreesia

Practice of the Month

Dr. San Gabriel

The Streator Children's Clinic
Streator, IL

Sees 120 patients each week

Have been using Phreesia since January, 2009

Their Favorite Feature: Clinical Scales & Surveys

Keady Gillman, the Practice Manager for the Streator Children's Clinic, saw a good opportunity with Phreesia. It was a chance for her practice to improve its patient check-in process, as well as implement two clinical scales in its Phreesia check-in interview—the M-CHAT and the Edinburgh Postnatal Depression Scale—to improve its quality of care.

- * **Leads to better health outcomes:** Dr. Rosvida San Gabriel uses the scales to get more information from her patients, and have a more productive discussion about their health.
- * **Saves money:** The practice doesn't have to pay a high premium to acquire the screenings, because Phreesia offers them as part of its package at no extra charge.
- * **Quick and easy:** With Phreesia, all scales are scored automatically and included on the patient printout. Thus, the front desk saves time, and Dr. San Gabriel can easily review the information with her patients.

We think that Phreesia could provide your practice with these same benefits. Please contact your Phreesia representative for more information.

Sincerely,

The team at Phreesia

"The patients like using Phreesia because the questions are clear and self-explanatory. We like it because now we get updated, accurate, and better patient information. On top of that, it's easy to use, and looks cool in the waiting room!"

- Rosvida San Gabriel, MD
