

Phreesia

Practice of the Month

Manhattan Fertility Center

New York, NY

Sees 120 patients a week

Has been using Phreesia since March, 2009

Why They Love Phreesia: Less prep work

Prior to Phreesia, Barbara Zimaras, the Practice Manager at Manhattan Fertility Center, and her staff would spend a lot of time preparing paperwork and collecting multiple paper forms from each patient. While other patients waited, a staff member had to review all forms for each person returning a patient clipboard. With Phreesia, Barbara no longer needs to make photocopies of forms, and can check-in more than one patient at a time.

- ✳ **Reduces paper waste:** Barbara and her staff no longer need to photocopy forms for incoming patients, saving time and paper.
- ✳ **Checks-in numerous patients simultaneously:** With Phreesia, all required questions must be answered, and paperwork can be completed concurrently by patients.
- ✳ **Reduces lost or jumbled forms:** Access to patient information online saves the staff from having to pass around paper files, which can lead to disorganized forms and increased time spent tracking down information.

We think that Phreesia could provide your practice with these same benefits. Please contact your Phreesia representative for more information.

Sincerely,

The Team at Phreesia

“My employees used to go online for each patient to check insurance eligibility. Now, we just print out the Patient Report, and we can process many patients at one time, without making more copies or worrying that the patients missed anything we need to know.”

- Barbara Zimaras,
Practice Administrator
