Birmingham Shelby Urology

Alabaster, AL

Sees 200 patients a week

Has been using Phreesia since May, 2008

Why They Love Phreesia: PMS/EMR integration

Before Phreesia's integration with her practice's EMR (UroChart), Kim Sharpe, the Practice Manager for Birmingham Shelby Urology, was spending a lot of time manually entering patient information. Now that Phreesia integrates with UroChart, she no longer has to devote this time and effort to repetitive tasks.

- * **Speeds up patient intake:** The practice's patient appointment schedule is automatically set up in Phreesia's Quick Check-in feature, so patients simply verify their information in one click.
- * **Streamlines office workflow:** All demographics information is transferred easily and seamlessly between Phreesia and UroChart, so Kim doesn't have to manually enter it multiple times.
- * **Increases patient satisfaction:** Because the PhreesiaPad is pre-populated with their demographics information, patients have a shorter and easier time checking in.

We think that Phreesia could provide your practice with these same benefits. Please contact your Phreesia representative for more information.

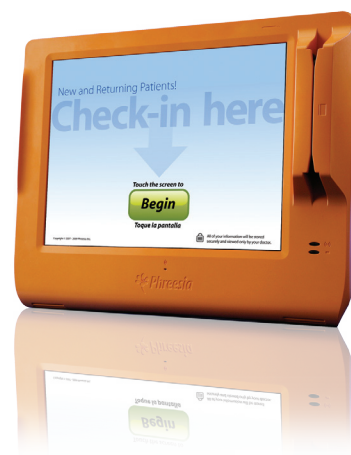

Sincerely,

The Team at Phreesia
888-654-7473
info@phreesia.com

“Because we use Quick Check-in for all of our patients and the information we entered into UroChart is displayed on the PhreesiaPad, all a patient has to do is review their demographics and edit if needed. Patients are much happier checking in now, because they can see that Phreesia recognizes them.”

- Kim Sharpe, Practice Manager
